Re: Advice on Course Planning for Taking the RSC Accredited Chemistry Programme

Dear Year 2 Chemistry Students,

For students who intend to follow the [RSC Accredited Chemistry Programme / Intensive Chemistry-Major curriculum \(144 credits\)](#), please note that CHEM2541 Introductory physical chemistry is offered in Semester 2 only, but not in every semester. If you want to do the RSC Accredited Chemistry Programme / Intensive Chemistry Major Curriculum, you should [take CHEM2541 in Semester 2 of your year 2 studies](#) so that you will have sufficient time to take other required course in the accredited programme / intensive chemistry-major curriculum.

Best regards,

Department of Chemistry
