

## Summer Research Opportunities at Imperial College London – Summer 2022, London UK

**Up to four** places for students to do summer research in the Department of Chemistry at Imperial College London will be available annually.

Imperial College London is **ranked 8<sup>th</sup> globally** in the Times Higher Education World University and QS World University Rankings. Moreover, the Chemistry Department has just moved into a brand new, state-of-the-art Innovation Campus in White City, London this summer.

As this internationalization experience is about research work, students must be proficient in chemistry, be in their third year of undergraduate studies, have a minimum overall cGPA of >3.0, and a good GPA in chemistry courses. There will be an interview. Students who are selected will apply for the Overseas Research Fellowship from the Faculty of Science for financial support. In addition, this experience can be credited for the CHEM4966 Chemistry Internship course. We aim to match the student's research interests/abilities with a suitable supervising professor at Imperial College.

Interested students to pursue research from July to August 2022 at Imperial College should send an **application email** to [emilyleung@hku.hk](mailto:emilyleung@hku.hk), with subject line "#Imperial2022", stating the overall cGPA, GPA of his/her chemistry major courses, how many chemistry courses have been taken so far, prior research experiences if any, together with (1) a copy of their latest transcript, which includes the grades of 2021-2022 Semester 1, and (2) an A4 page of a short essay stating their motivations and ambitions for doing research, how this experience could benefit their future academic plans, (3) areas of research interests and potential supervisors at the Department of Chemistry at Imperial College by **March 1, 2022 5:00 pm.**
