<b>CHEM3143 Introduction to materials chemistry (6 credits)</b>		Academic Year	2020														
Offering Department	Chemistry	Quota	100														
Course Co-ordinator	Dr Y F Wang, Chemistry < wanglab@hku.hk >																
Teachers Involved	(Dr Y F Wang, Chemistry)																
Course Objectives	This course provides an introduction to materials chemistry. The goal is to present the fundamental knowledge of various types of materials including their structure, synthesis, and properties. This course is essential for students who wish to take advanced materials course.																
Course Contents & Topics	Classification of materials; structure of crystalline solids; phases and phase transformation; defects and mechanical properties; alloys and ceramics; introduction to soft matter; structure, synthesis, and properties of polymers; colloids; liquid crystals; viscoelasticity; applications of materials; characterization techniques.																
Course Learning Outcomes	<p>On successful completion of this course, students should be able to:</p> <table border="1"> <tr> <td>CLO 1</td> <td>describe different materials classification and their composition, structures, and properties, and to apprehend the concept of structure/property relationship</td> </tr> <tr> <td>CLO 2</td> <td>explain different structures and phases, phase transformation in solid materials</td> </tr> <tr> <td>CLO 3</td> <td>understand defects in crystalline solid materials and relate them with mechanical properties</td> </tr> <tr> <td>CLO 4</td> <td>appreciate soft materials and some examples and characteristics</td> </tr> <tr> <td>CLO 5</td> <td>understand the concept of molecular weight distribution in polymers, and explain the effect of polymerization kinetics to their properties</td> </tr> <tr> <td>CLO 6</td> <td>identify examples of some important materials, and explain their structure-property relationship</td> </tr> <tr> <td>CLO 7</td> <td>demonstrate knowledge in materials characterizations</td> </tr> </table>			CLO 1	describe different materials classification and their composition, structures, and properties, and to apprehend the concept of structure/property relationship	CLO 2	explain different structures and phases, phase transformation in solid materials	CLO 3	understand defects in crystalline solid materials and relate them with mechanical properties	CLO 4	appreciate soft materials and some examples and characteristics	CLO 5	understand the concept of molecular weight distribution in polymers, and explain the effect of polymerization kinetics to their properties	CLO 6	identify examples of some important materials, and explain their structure-property relationship	CLO 7	demonstrate knowledge in materials characterizations
CLO 1	describe different materials classification and their composition, structures, and properties, and to apprehend the concept of structure/property relationship																
CLO 2	explain different structures and phases, phase transformation in solid materials																
CLO 3	understand defects in crystalline solid materials and relate them with mechanical properties																
CLO 4	appreciate soft materials and some examples and characteristics																
CLO 5	understand the concept of molecular weight distribution in polymers, and explain the effect of polymerization kinetics to their properties																
CLO 6	identify examples of some important materials, and explain their structure-property relationship																
CLO 7	demonstrate knowledge in materials characterizations																
Pre-requisites (and Co-requisites and Impermissible combinations)	Pass in CHEM2441; and Pass in CHEM2541 or CHEM2341																
Course Status with Related Major/Minor /Professional Core	2020 Major in Chemistry (Intensive) ( Core/Compulsory ) 2020 Minor in Chemistry ( Disciplinary Elective ) 2019 Major in Chemistry (Intensive) ( Core/Compulsory ) 2019 Minor in Chemistry ( Disciplinary Elective ) 2018 Major in Chemistry (Intensive) ( Core/Compulsory ) 2018 Minor in Chemistry ( Disciplinary Elective ) 2017 Major in Chemistry (Intensive) ( Core/Compulsory ) 2017 Minor in Chemistry ( Disciplinary Elective ) 2016 Major in Chemistry (Intensive) ( Core/Compulsory ) 2016 Minor in Chemistry ( Disciplinary Elective )																
Course to PLO Mapping	2020 Major in Chemistry (Intensive) < PLO 1,2,3 > 2019 Major in Chemistry (Intensive) < PLO 1,2,3 > 2018 Major in Chemistry (Intensive) < PLO 1,2,3 > 2017 Major in Chemistry (Intensive) < PLO 1,2,3 > 2016 Major in Chemistry (Intensive) < PLO 1,2,3 >																
Offer in 2020 - 2021	Y	1st sem	Examination Dec														
Offer in 2021 - 2022	Y																
Course Grade	A+ to F																

Grade Descriptors	A	Demonstrate thorough knowledge of essential facts, concepts, principles, and theories related to classification of materials. Show deep understanding of materials structures at different length scales and the relationship with materials properties particularly for classical solid materials and soft materials. Show extensive knowledge in synthesis, characterization and applications of common polymers. Demonstrate strong ability to apply/integrate knowledge and theory related to the synthesis and applications of materials. Show strong ability to analyze novel problems and critical use of data/experimental results to draw appropriate and insightful conclusions related to materials synthesis/characterization.		
	B	Demonstrate thorough knowledge of essential facts, concepts, principles, and theories related to classification of materials. Show deep understanding of materials structures at different length scales and the relationship with materials properties particularly for classical solid materials and soft materials. Show extensive knowledge in synthesis, characterization and applications of common polymers. Demonstrate evidence to apply/integrate knowledge and theory related to the synthesis and applications of materials. Show evidence to analyze novel problems and critical use of data/experimental results to draw appropriate and insightful conclusions related to materials synthesis/characterization.		
	C	Demonstrate general but incomplete command of knowledge of essential facts, concepts, principles, and theories related to classification of materials. Show some but insufficient understanding of materials structures at different length scales and the relationship with materials properties particularly for classical solid materials and soft materials. Show some knowledge in synthesis, characterization and applications of common polymers. Demonstrate evidence to apply/integrate knowledge and theory related to the synthesis and applications of materials. Show ability to analyze problems to most familiar situations and mostly correct but erroneous use of data/experimental results to draw appropriate conclusions related to materials synthesis/characterization.		
	D	Demonstrate partial but limited command of knowledge of essential facts, concepts, principles, and theories related to classification of materials. Show deep understanding of materials structures at different length scales and the relationship with materials properties particularly for classical solid materials and soft materials. Show limited knowledge in synthesis, characterization and applications of common polymers. Demonstrate evidence but limited ability to apply/integrate knowledge and theory related to the synthesis and applications of materials. Show limited ability to analyze problems to most familiar situations and mostly correct but erroneous use of data/experimental results to draw appropriate conclusions related to materials synthesis/characterization.		
	Fail	Demonstrate little or no evidence of command of knowledge of essential facts, concepts, principles, and theories related to classification of materials. Show little or no understanding of materials structures at different length scales and the relationship with materials properties particularly for classical solid materials and soft materials. Show little or no knowledge in synthesis, characterization and applications of common polymers. Demonstrate limited or no evidence of ability to apply/integrate knowledge and theory related to the synthesis and applications of materials. Show little or no ability to analyze novel problems and use of data/experimental results to draw appropriate and insightful conclusions related to materials synthesis/characterization.		
Course Type	Lecture-based course			
Course Teaching & Learning Activities	<b>Activities</b>	<b>Details</b>	<b>No. of Hours</b>	
	Lectures		36	
	Tutorials		12	
	Reading / Self study		100	
Assessment Methods and Weighting	<b>Methods</b>	<b>Details</b>	<b>Weighting in final course grade (%)</b>	<b>Assessment Methods to CLO Mapping</b>
	Examination		70	CLO 1,2,3,4,5,6,7
	Test	(continuous assessment)	30	CLO 1,2,3,4,5,6,7
Required/recommended reading and online materials	W. D. Callister: Materials Science and Engineering: An Introduction (8th or 9th edition) F. W. Billmeyer: Textbook of Polymer Science (John Wiley and Sons, 1984) G. Odian: Principles of Polymerizations (John Wiley and Sons, 2004) M. P. Stevens: Polymer Chemistry: An Introduction (Oxford University Press, 1999)
