Re: Advice on Course Planning for Taking the RSC Accredited Chemistry Programme

Dear Year 2 Chemistry Students,

For students who intend to follow the [RSC Accredited Chemistry Programme / Intensive Chemistry-Major Curriculum \(144 credits\)](#), please note that **CHEM2541** Introductory physical chemistry is offered in **Semester 2 only**, but not in every semester. If you want to do the RSC Accredited Chemistry Programme / Intensive Chemistry-Major Curriculum, you should [take CHEM2541 in S2 of your year 2 studies](#) so that you will have sufficient time to take other required courses in the accredited programme/intensive chemistry-major curriculum.

Best regards,

Department of Chemistry
