<b>CHEM3441 Organic chemistry II (6 credits)</b>		Academic Year	2022
Offering Department	Chemistry	Quota	300
Course Co-ordinator	Dr Z X Huang (1st sem); Prof X Y Li (2nd sem), Chemistry < huangzx@hku.hk; xiaoyuli@hku.hk >		
Teachers Involved	(Dr Z X Huang, Chemistry) (Prof X D Li, Chemistry) (Prof X Y Li, Chemistry)		
Course Objectives	As a continuation from CHEM2441 Organic Chemistry I, this course aims to provide a solid foundation of organic chemistry together with CHEM2441. It focuses primarily on the basic principles to understand the structure and reactivity of organic molecules, with examples illustrating the role of organic chemistry in daily life and industry.		
Course Contents & Topics	Chemistry of common organic functional groups: ketones and aldehydes; carboxylic acids and their derivatives; amines; aromatic compounds. Principles of organic synthesis. Detailed considerations of reaction mechanisms. Spectroscopic tools (UV-Vis, IR, NMR, and MS) for characterization and identification of organic compounds.		
Course Learning Outcomes	On successful completion of this course, students should be able to:		
	CLO 1	draw correct structural representations of organic molecules	
	CLO 2	understand the basic principles of structure and reactivity of organic molecules	
	CLO 3	determine structures of organic compounds based on spectroscopic data	
	CLO 4	write reasonable mechanisms for transformations of common functional groups (alcohols, ethers, carbonyl compounds, aldehydes, ketones, carboxylic acids, acyl halides, anhydrides, esters, amides, nitriles, and amines)	
	CLO 5	appreciate the importance of organic chemistry in daily life	
	CLO 6	devise synthetic pathways to organic compounds using functional group chemistry	
Pre-requisites (and Co-requisites and Impermissible combinations)	Pass in CHEM2441 [Remarks: CHEM3441 has been changed to lecture-based course from semester 2, 2015-16. For Chemistry students who admitted in 2014-15 or before, they must enroll also CHEM3443 for enrolling CHEM3441 (new version without lab component) to meet the Chemistry Major requirements.]

Offer in 2022 - 2023	Y	1st sem	2nd sem
		Examination	Dec May
Offer in 2023 - 2024	Y		
Course Grade	A+ to F		

Grade Descriptors	A	Demonstrate thorough mastery at an advanced level of extensive knowledge and skills required for attaining all the course learning outcomes. Show strong analytical and critical abilities and logical thinking, with evidence of original thought, and ability to apply knowledge to a wide range of complex, familiar and unfamiliar situations.		
	B	Demonstrate substantial command of a broad range of knowledge and skills required for attaining at least most of the course learning outcomes. Show evidence of analytical and critical abilities and logical thinking, and ability to apply knowledge to familiar and some unfamiliar situations.		
	C	Demonstrate general but incomplete command of knowledge and skills required for attaining most of the course learning outcomes. Show evidence of some analytical and critical abilities and logical thinking, and ability to apply knowledge to most familiar situations.		
	D	Demonstrate partial but limited command of knowledge and skills required for attaining some of the course learning outcomes. Show evidence of some coherent and logical thinking, but with limited analytical and critical abilities. Show limited ability to apply knowledge to solve problems.		
	Fail	Demonstrate little or no evidence of command of knowledge and skills required for attaining the course learning outcomes. Lack of analytical and critical abilities, logical and coherent thinking. Show very little or no ability to apply knowledge to solve problems.		
Course Type	Lecture-based course			
Course Teaching & Learning Activities	<b>Activities</b>	<b>Details</b>	<b>No. of Hours</b>	
	Lectures		36	
	Tutorials		12	
	Reading / Self study		100	
Assessment Methods and Weighting	<b>Methods</b>	<b>Details</b>	<b>Weighting in final course grade (%)</b>	<b>Assessment Methods to CLO Mapping</b>
	Assignments	(assignment x 2)	20	CLO 1,2,3,4,5,6
	Examination		50	CLO 1,2,3,4,5,6
	Test	(mid-term test x 2)	30	CLO 1,2,3,4,5,6
Required/recommended reading and online materials	"Organic Chemistry", by Paula Y. Bruice, 2016, 8th Edition, Pearson, with e-text and Mastering Chemistry. Chapters 14-20.
