CHEM4144 Advanced materials (6 credits)		Academic Year	2022
Offering Department	Chemistry	Quota	30
Course Co-ordinator	Dr E C M Tse, Chemistry < ecmtse@hku.hk >		
Teachers Involved	(Dr E C M Tse, Chemistry) (Dr K Okuro, Chemistry)		
Course Objectives	This course is a continuation from Introduction to Materials Chemistry. It provides a more comprehensive overview on materials chemistry and application of materials in advanced technology. The most recent development in materials chemistry will also be discussed.		
Course Contents & Topics	This course covers both hard and soft materials in the macroscale and nanoscale regimes for renewable energy, catalytic devices, sustainable resourcification, wearable biosensors, nanoelectronics, membrane technology, and other specialty applications. Advanced materials synthesis and characterization methods are also introduced.		
Course Learning Outcomes	On successful completion of this course, students should be able to:		
	CLO 1	describe the mechanisms and kinetics of copolymerizations, coordination polymerizations, and living polymerizations	
	CLO 2	identify examples of some engineering polymers for high temperature/high strength applications, and how are their properties affected by the molecular structures	
	CLO 3	demonstrate knowledge in advanced materials characterization techniques	
	CLO 4	understand the working principles of materials for information storage and opto-electronic applications	
Pre-requisites (and Co-requisites and Impermissible combinations)	Pass in CHEM3143

Offer in 2022 - 2023	Y	2nd sem	Examination May
Offer in 2023 - 2024	Y		
Course Grade	A+ to F		

Grade Descriptors	A	Demonstrate thorough knowledge and understanding of essential facts, concepts, principles, and theories relating to frontier approach in polymer synthesis, properties, application, and characterization of materials for advanced technology. Show strong ability to apply and integrate knowledge and theory relating to the synthesis and applications of advanced materials. Show strong ability to analyze novel problems and critical use of data and experimental results to draw appropriate and insightful conclusions relating to advanced materials synthesis and their properties.		
	B	Demonstrate substantial command of knowledge and understanding of essential facts, concepts, principles, and theories relating to frontier approach in polymer synthesis, properties, application, and characterization of materials for advanced technology. Show evidence to apply and integrate knowledge and theory relating to the synthesis and applications of advanced materials. Show evidence to analyze novel problems and correct use of data and experimental results to draw appropriate conclusions relating to advanced materials synthesis and their properties.		
	C	Demonstrate general but incomplete command of knowledge and understanding of essential facts, concepts, principles, and theories relating to frontier approach in polymer synthesis, properties, application, and characterization of materials for advanced technology. Show evidence of some abilities to apply and integrate knowledge and theory relating to the synthesis and applications of advanced materials. Show ability to analyze problems to most familiar situations and mostly correct but erroneous use of data and experimental results to draw appropriate conclusions relating to advanced materials synthesis and their properties.		
	D	Demonstrate partial but limited command of knowledge and understanding of essential facts, concepts, principles, and theories relating to frontier approach in polymer synthesis, properties, application, and characterization of materials for advanced technology. Show evidence of limited abilities to apply and integrate knowledge and theory relating to the synthesis and applications of advanced materials. Show limited ability to analyze problems to most familiar situations and mostly correct but erroneous use of data and experimental results to draw appropriate conclusions relating to advanced materials synthesis and their properties.		
	Fail	Demonstrate little or no evidence of command of knowledge and understanding of essential facts, concepts, principles, and theories relating to frontier approach in polymer synthesis, properties, application, and characterization of materials for advanced technology. Show little or no evidence of abilities to apply and integrate knowledge and theory relating to the synthesis and applications of advanced materials. Show little or no ability to analyze problems to most familiar situations and erroneous use of data and experimental results to draw appropriate conclusions relating to advanced materials synthesis and their properties.		
Course Type	Lecture-based course			
Course Teaching & Learning Activities	Activities	Details	No. of Hours	
	Lectures		36	
	Tutorials	or discussion	12	
	Reading / Self study		100	
Assessment Methods and Weighting	Methods	Details	Weighting in final course grade (%)	Assessment Methods to CLO Mapping
	Assignments	Literature (Article / Patent)	30	CLO 1,2,3,4
	Examination	Exam / Presentation	50	CLO 1,2,3,4
	Test	Test / Project	20	CLO 1,2,3,4
Required/recommended reading and online materials	Specialist references will be given throughout the course.
