## Enquiry for Major/Minor/Programme Requirements

Minor Title Minor in Chemistry
Offered to students
admitted to Year 1 in
Objectives:
The Minor in Chemistry aims to provide students with fundamental knowledge and skills of chemistry. The minor
curriculum is flexible. Students of different majors in science and other disciplines will be able to select courses that
complement their major areas of study as well as enhance their knowledge in chemistry.
Learning Outcomes:
By the end of this programme, students should be able to:
PLO 1 : understand and apply the basic concepts of chemistry (by means of coursework and laboratory-based

learning in the curriculum) PLO 2: apply chemistry concepts in other subjects (by means of coursework and laboratory-based learning in $\quad$| the curriculum) |
| :--- |
| PLO 3 : transfer the basic concepts to complement their major area of study (by means of coursework and |
| laboratory-based learning in the curriculum) |

Impermissible Combination:
Major in Chemistry
Major in Chemistry (Intensive)

```
Required courses (42 credits)
    1. Introductory level courses (24 credits)
    Disciplinary Core Courses (12 credits)
        CHEM1042 General chemistry I (6)
        CHEM1043 General chemistry II (6)
    Disciplinary Electives (12 credits)
        At least 12 credits selected from the following courses:
        CHEM2241 Analytical chemistry I (6)
        CHEM2341 Inorganic chemistry I (6)
        CHEM2441 Organic chemistry I (6) CHEM2441 and CHEM2442
        CHEM2442 Fundamentals of organic chemistry (6)
                    Introductory physical chemistry (6)
```

    2. Advanced level courses (18 credits)
    Disciplinary Electives (18 credits)
        At least 18 credits of advanced level Chemistry courses (CHEM3XXX or CHEM4XXX level), subject to
    prerequisite requirements. The current course list includes courses in List \(A\) :
        List A
        CHEM3141 Environmental chemistry (6)
        CHEM3142 Chemical process industries and analysis (6)
        CHEM3143 Introduction to materials chemistry (6)
        CHEM3144 Fundamentals of Nuclear Magnetic Resonance (6)
        CHEM3241 Analytical chemistry II: chemical instrumentation (6)
        CHEM3242 Food and water analysis (6)
        CHEM3243 Introductory instrumental chemical analysis (6)
        CHEM3341 Inorganic chemistry II (6)
        CHEM3342 Bioinorganic chemistry (6)
        CHEM3441
    Organic chemistry II (6)
    Organic chemistry of biomolecules (6)
    Organic chemistry laboratory (6)
    Integrated laboratory (6)
    Physical chemistry: Introduction to quantum chemistry
    (6)
Physical chemistry: statistical thermodynamics and
kinetics theory (6)
Directed studies in chemistry (6)
Symmetry, group theory and applications (6)
Interfacial science and technology (6)
Advanced materials (6)
Medicinal chemistry (6)
Supramolecular chemistry (6)
Frontiers in Modern Chemical Science (6)
Modern chemical instrumentation and applications (6)
Analytical chemistry (6)
Advanced inorganic chemistry (6)
Organometallic chemistry (6)
Advanced organic chemistry (6)
Integrated organic synthesis (6)
Chemical biology (6)
Computational chemistry (6)
Advanced physical chemistry (6)
Electrochemical science and technology (6)
Chemistry literacy and research (6)
Capstone experience for chemistry undergraduates:
HKUtopia (6)
CHEM4966 Chemistry internship (6)
CHEM4999 Chemistry project (12)

## Notes:

1. Double counting of credits is not permissible for major-minor or double-minors combinations. For a course appears as a core course ("disciplinary core") in the major-minor or double-minors, students have to make up the credits by taking replacement course in the minor. For details, please refer to "Students taking double Majors, Major-Minor or double Minors with overlapping course requirements" in the BSc syllabuses.
2. Students must have level 3 or above in HKDSE Chemistry or equivalent to take this major. Students who do not fuifill this requirement are advised to take CHEM1041 Foundations of chemistry.

## Remarks:

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected primary science major in order to satisfy the degree graduation requirements.
